

We need radio stations like K-Love that operate on FM translators. Please do not expand the LPFM to take priority over these types of stations. K-Love is heard on 88.3 FM in our community and provides a service like no other available. It provides quality uplifting music and announcements that are like a life preserver to a drowning man. Hope is a powerful message and it needs to be available to those that need it most. Typical programming in our area does not provide this message of serving the greater good. Please don't force this type of programming off the air to make way for another top 40 country countdown!
